Eagle experience walk

Under the spell of the golden eagle

As a special highlight the falconry Galina offers you the opportunity to experience a golden eagle close up and „privately“.

Together with the falconer and our female golden eagle you can travel to the Sareis mountain in the chair lift, to wonder at her magnificent flying skills during a comfortable walk in the valley.

Our golden eagle is a beautiful female weighing over 5 kilograms and with a wing span of 2.2 metres.

The powerful animal will take off and land on the arm of the falconer just a few metres away from you, and will accompany you silently and majestically, circling the valley directly above your heads.
